Education

University of Waterloo

Bachelor of Software

Engineering 2020

91% · 3.9 GPA

Dean's Honours List

Work Experience

Google

Software Engineering Intern · YouTube Ads

Sept. 2019 - Dec. 2019

Mountain View, California

Python, TensorFlow

- Automated user profile model retraining setup process, reducing the time it takes to add a model to the retraining pipeline from weeks to hours
- Integrated the retraining pipeline with a new workflow management service to provide better failure handling and job scheduling

Facebook

Software Engineering Intern · Facebook Connectivity

Jan. 2019 - Apr. 2019

Menlo Park, California

Python, C++, Go, gRPC, Software-Defined Networking

- Implemented network service chaining on top of Open vSwitch for the open-source project, Magma, to allow dynamic service configurations from the cloud
- Improved usage reporting accuracy of the Policy Charging and Rules Function system by implementing asynchronous session termination and flow deletion
- Designed an abstraction layer on top of OpenFlow constructs to simplify network service development and provide additional validation

Google

Software Engineering Intern · Gmail

May 2018 - Aug. 2018

Waterloo, Ontario

Objective-C, Java, gRPC, iOS

- Designed and shipped content insertion feature for Gmail add-ons in iOS Gmail - allowing users to insert HTML content into the email using third-party add-ons during email composition
- Implemented caching involving both the mobile client and the Java client library to reduce redundant network requests while keeping the add-ons listing updated

Wish

Software Engineering Intern

Sept. 2017 - Dec. 2017

San Francisco, California

Python (Tornado), JQuery, MongoDB

- Built and maintained API and webhook integrations with shipping companies and third-party providers that processed millions of shipping updates daily
- Added new metrics regarding shipment tracking information to the data pipeline for more detailed alerts on delays and backlogging
- Developed internal tools for batch modification of tracking information and automatic troubleshooting of tracking problems

Remind

Software Engineering Intern

Jan. 2017 - Apr. 2017

San Francisco, California

Ruby (Rails), React, Go, PostgreSQL, Redis

- Integrated Appboy with the Ruby on Rails backend to track user events and trigger campaigns to send emails and push notifications
- Designed and developed a critical monitoring service in Ruby that sent metrics from Interana to Datadog for anomaly detection of funnel metrics
- Created React components to display and modify family information of students

Ivy Global

Software Engineer

Feb. 2016 - Dec. 2016

Toronto, Ontario

ASP, Node, VBScript, JQuery, SQL Server

- Created a personalized study plan feature by analyzing over 7 million questions
- Developed a central login portal for all Ivy Global services utilizing OAuth 2.0

Awards

Canadian Computing Olympiad · **Bronze Medalist**

May 2015
